# About US

**SIPFX**

Crypto arbitrage scanners allow users to profit from price differences across different cryptocurrency exchanges. Crypto arbitrage scanners enable traders to see what platforms are best for buying a particular cryptocurrency and where it should be sold to maximize returns.

# Mission

## ARBITRAGE TRADING

We provide a seamless and profitable arbitrage trading experience for our users through innovative technology and reliable support

# What is cryptocurrency arbitrage?

Arbitrage is the process of taking advantage of price inefficiencies in financial markets. While cryptocurrency isn't legal tender in most countries, it's a tradable asset. Its volatile price can often cause price discrepancies. It is possible to buy and sell the same asset on different exchanges (or even on the same exchange) in a way that can result in a profit for the trader.

To better understand how order book exchanges work, let's take an example.

In this setup, Bid orders are on the left, and Ask orders are on the right. If you want to trade instantly, you're the taker. You can ensure immediate execution by placing a limit order at the bid-ask spread or using a market order to trade at the current asset price.

# Company Goals

## ARBITRAGE TRADING

### Benefit with Arbitrage Trading

Effective Profit management is paramount in arbitrage trading. Mitigating market risk and execution risk is essential for longterm success. Understanding how to hedge positions and manage exposure is crucial.

### SIPFX Investing Control

Investment controlling is the planning, management and monitoring of a company's investments. It includes analysis of investment needs, planning of allocations, control of capital expenditures, and evaluation of results.

# Terms & Conditions

- Cryptocurrency USDT is accepted for both deposit and withdrawal transactions.
- Daily withdrawals are permitted for working income, while withdrawals for non-working income can be processed after a 5-day period.
- Withdrawals are available 24/7.
- Investors can withdraw 60% of their package anytime, but if they've already withdrawn one month's interest, that amount will be deducted from their capital. For example, if you invest \$1000, withdraw \$100 in a month, and later attempt to withdraw 60% of your capital, you'll be left with \$500.
- Matching Bonus Income, up to \$40, will persist.
- Royalty will be awarded based on the chosen package.
